

Time & Labor Management with Scheduling

Enhance the employee experience with powerful time and scheduling solutions

Overseeing employee schedules and tracking attendance can be a significant challenge, even for the most experienced leaders.

isolved Time & Labor Management, coupled with isolved Scheduling, can help reduce the time spent managing schedules and monitoring attendance by providing flexible options and valuable insights to keep your business running smoothly. And because our solutions are intelligently connected, all data is immediately accessible for accurate payroll processing.

Convenient Self-Service

Empower your employees with flexible access to time and scheduling capabilities from any device. It's easy for your people to perform important actions such as punching in and out of shifts, requesting coverage, assigning schedules and more, all on the fly.

Real-time Visibility

Drive collaboration and alignment across teams with real-time visibility into employee scheduling and time tracking data. Managers can instantly access a scheduling layer on an employee's timecard to gain insight into shift attendance, punctuality, and absences.

Accurate Time and Scheduling

Effortlessly track, manage, and process employee time, scheduling, and payroll within isolved's intelligently connected platform. Configure notifications and permissions to ensure compliance with staffing and time tracking requirements.

Count on isolved to help keep your business running smoothly

Time & Labor Management

- View and manage employee time and attendance data, including paid time off, overtime, and compensatory time to better support your team
- Streamline payroll processing with the ability to quickly review time card errors, resolve objections, and prevent mistakes, while complying with regulations
- Make prior period adjustments to ensure equitable compensation, compliance and accurate record keeping
- Leverage a variety of time clocks and location-based punching options to meet diverse workforce needs
- Receive real-time alerts for early or late check-ins, unscheduled absences, time card objections, and more, empowering you to effectively manage attendance

Scheduling

- Empower employees to effortlessly view, manage, and participate in scheduling from any device, with the ability to request shift coverage on the fly
- Manage availability in real-time with insights on shift eligibility, worker unavailability, shift request status and coverage gaps across individuals and groups
- View real-time notifications when schedules are created, published or require updates based on employee feedback
- Improve operational efficiencies by leveraging scheduling reports to increase visibility into employee attendance
- Configure attendance rules based on preferred criteria to ensure employees are assigned to the appropriate shifts

Free yourself from tediously managing schedules and monitoring attendance. Embrace effortless efficiency with **isolved Time & Labor Management with Scheduling**.
